<b>Discipline of Certification:</b>	Aviation, Space and Defense Quality Management Systems
<b>Certification Standard:</b>	AS 9100: 2016
<b>Certification Scheme:</b>	Industry Controlled Other Party (ICOP) Aviation, Space and Defense Quality Management System (QMS) certification scheme

*The scope of accreditation represents broad classifications granted by IAS on the basis of the certification processes demonstrated by the certification body (CB). Accreditation is based on the competence and ability to effectively apply the requirements of the relevant certification standards listed in the CB's scope of accreditation. IAS accreditation entails review of the CB's own management system, on-site assessment of the CB's certification processes, review of CB's access to expertise including onsite observation of the CB when conducting certification audits at client sites. Under the conditions of accreditation, the CB is obligated to use equivalent certification practices covering the specific scopes as listed for all clients and as demonstrated during the accreditation process. Accreditation does not cover certification in areas outside the scope of this accreditation certificate. Accreditation does not imply endorsement of the products or the design or performance characteristics of products certified by the CB.*
